**APPLICATION FOR CERTIFICATE OF SERVICE AUTHORITY
TO PROVIDE INTEREXCHANGE AND NON-SWITCHED LOCAL
EXCHANGE TELECOMMUNICATIONS SERVICES**

IPC Network Services, Inc. ("IPC") pursuant to sections 392.410, 392.420, 392.430 and 392.440 RSMO 2000 and 4 CSR 240-2.060, files this verified application respectfully requesting that the Missouri Public Service Commission (the "Commission") issue an order that:

- 1) grants IPC a Certificate of Service Authority to provide interexchange telecommunications services and non-switched local exchange telecommunications services pursuant to Chapter 392 of the Missouri Revised Statutes;
- 2) grants competitive status to IPC; and
- 3) waives certain Commission rules and statutory provisions pursuant to Section 392.420 RSMO 2000.

In support of its request, IPC states:

1. IPC is a corporation duly organized and existing under and by virtue of the laws of the state of New York, with authority to do business in the state of Missouri. A copy of the Articles of Incorporation issued by the State of New York, and the Certificate of Authority from the Missouri Secretary of State to transact business in Missouri are attached hereto as Exhibit 1. The legal name and principal office or place of business of IPC are:

IPC Network Services, Inc.

IPC proposes to provide interexchange telecommunications services and non-switched local exchange telecommunications services throughout the state of Missouri and therefore seeks statewide authority. A complete description of IPC's services is described in Exhibit 2, which is attached hereto. IPC intends to offer such services by reselling services obtained from existing certificated telecommunications providers or by and through its own facilities when they are available. Service will be available 24 hours a day, seven days a week, where facilities permit.

3. IPC has the technical and managerial expertise to provide intrastate interexchange services and non-switched local exchange services within the State of Missouri. Key personnel biographies of IPC's management are provided in Exhibit 3, which is attached hereto. IPC has been granted authority to provide these services in Texas, California, Illinois, Connecticut, Massachusetts, New York, Maryland and Pennsylvania. IPC is in the process of applying for such authority in other states as well. IPC has not been denied an authorization by any state.

4. IPC has the financial soundness and ability to provide interexchange telecommunications services in the State of Missouri. Copies of IPC's most recent financial statements are attached as Exhibit 4.

5. IPC's proposed tariff is attached as Exhibit 5. The proposed tariff, which has a 45-day effective date, contains the rules and regulations applicable to IPC's customers, a description of the services offered, and the rates associated with the services.

6. IPC has no pending action or final unsatisfied judgment or decision against it from any state or federal agency or court which involves customer service or rates within the past three years.

7. IPC hereby certifies that it has no overdue annual reports or assessment fees.

8. IPC believes that granting the requested certificate is in the public interest for the following reasons:

a. IPC's proposed intrastate telecommunications services are developed to serve the telecommunications needs of subscribers who can not otherwise realize similar cost savings through major carriers.

b. An increase in the traffic generated through provision of IPC's proposed intrastate services over existing major carrier's communications facilities will improve the efficiency and reduce the major carrier's costs in provision of these services.

c. The public will benefit from greater consumer choice created through the broadening of innovative telecommunications service alternatives and ongoing affordable rates made possible by the additional competitive pressure placed on other competitors.

9. IPC requests classification as a competitive telecommunications company within the State of Missouri. IPC believes that its proposed services will be subject to sufficient competition to justify a lesser degree of regulation. Granting of this application will allow greater price and service options for telecommunications users.

10. IPC also requests, pursuant to Section 392.420, that the Commission waive the application of the following rules and statutory provisions as they relate to the regulation of IPC:

Statutes

392.210.2	Uniform System of Accounts
392.240(1)	Just and Reasonable Rates
392.270	Ascertain Property Values
392.280	Depreciation Accounts
392.290	Issuance of Securities
392.300.2	Acquisition of Stock
392.310	Issuance of Stocks and Debt
392.320	Stocks Dividend Payment

392.330 Issuance of Securities, Debts & Notes
392.340 Reorganizations

Regulations

4 CSR 240-10.010 Books and Records (IPC's records are kept at the address in
paragraph 1 above)
4 CSR 240-10.020 Depreciation Fund Income
4 CSR 240-30.040 Uniform System of Accounts

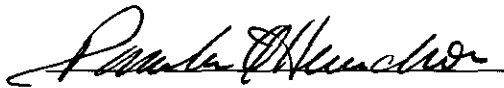

The above statutes and regulations have been waived previously for other applicants seeking certification as competitive interexchange telecommunications carriers and competitive non-switched local exchange telecommunications carriers. These rules and statutory provisions are principally designed to apply to non-competitive telecommunications carriers. As a result, it would be inconsistent with the goal and purpose of federal and state statutes to apply these rules and statutes to a competitive company such as IPC.

12. IPC will comply with all applicable Commission rules except those which are specifically waived by the Commission pursuant to a request filed by IPC.

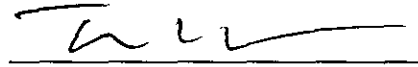

* * *

WHEREFORE, IPC respectfully requests that the Missouri Public Service Commission grant it a certificate of service authority to provide interexchange telecommunications services and non-switched local exchange telecommunications services within the State of Missouri. IPC also requests classification as a competitive telecommunications company. In addition, IPC requests a waiver of the above-referenced rules and statutory provisions.

Respectfully submitted,

TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the heading of each page. Pages are numbered sequentially. However, occasionally, when a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the heading of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Tariff approval process, the most current page number on file with the Commission is not always the page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.3.6.
 - 2.3.6.A.
 - 2.3.6.A.1.
 - 2.3.6.A.1.(a).

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING -
TELECOMMUNICATIONS SERVICE PRIORITY

1. General

- a. The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING -
TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

1. General (Cont'd)

- b. The TSP program has two components, restoration and provisioning.
 - i. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
 - ii. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING -
TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

2a. TSP Request Process - Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

a determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.

1. National Security Leadership
2. National Security Posture and U.S. Population Attack Warning
3. Public Health, Safety, and Maintenance of Law and Order
4. Public Welfare and Maintenance of National Economic Posture

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING -
TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

2a. TSP Request Process - Restoration (Cont'd)

- b. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
- c. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
- d. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
- e. Submit the SF 315 to the OPT.
- f. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING -
TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

2b. TSP Request Process - Provisioning

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2a. above for restoration priority assignment except for the following differences. The user should:

- a. Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2a(a) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
- b. Verify that the Company cannot meet the service due date without a TSP assignment.
- c. Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.
